

OKAN DEMIR BAYKAL

+31 6 13934556 | Delft, Netherlands 2624HG | O.D.Baykal@student.tudelft.nl

EDUCATION

Technical University of Delft

Computer Science and Engineering

Aug 2021 – Present

Delft, Netherlands

Ozel Ege Lisesi

Science and mathematics track

Sep 2017 – Jun 2021

Izmir, Turkey

- Took Computer Science A, Calculus AB, and Statistics Advanced Placement courses.

ACADEMIC & EXTRACURRICULAR ACTIVITIES

Volunteer Laboratory Assistant

Ozel Ege Lisesi Mechatronics Laboratory

Sep 2019 – Present

Izmir, Turkey

- Mentored 6 teams of 10th and 11th Grade students on making of the robotics and software projects:
 - * Smart Fridge with Computer Vision Abilities
 - * Assistive Device with Facial Feature Recognition for Patients with Autism Spectrum Disorder
 - * Radiation Sensitive Unmanned Land Vehicle Platform for Search and Securing of Nuclear Waste
 - * A HES Alternative: Real-Time Mask Detection on a Mass Scale for COVID-19 Risk Management
 - * Self-Expanding Earthquake Tent with Mesh Network Communications
 - * Autonomous Border Patrol Rover
- Researched and organized supply of all initial lab equipment, maintained said equipment and planned further expansion.

Student Researcher

Koc University Summer Research Program

Jun 2019 – Aug 2019

Istanbul, Turkey

- Worked under the supervision of Prof. Deniz Yuret in the Koc University Artificial Intelligence Laboratory for 4 weeks on sentiment aware paraphrase generation with deep learning under the Koc University Summer Research Program.
- Learned and utilized Koc University's deep learning framework, Knet.jl, and AutoGrad in Julia.

PROJECTS

Personal Website - Ongoing Project

okanbaykal.com

Aug 2020 – Present

Izmir, Turkey

- Built and hosted a static site using HTML and CSS on GitHub.
- Componentized site elements and re-built the site in Vue 2 and developed a theming system.
- Planned back-end architecture for authorized login system and blog posting system.

Assistive Glasses for the Vision Impaired

Software and Robotics Project

Sep 2018 – Mar 2020

Izmir, Turkey

- Developed computer vision software for obstacle classification and distance estimation using TensorFlow.
- Developed accessibility and setup features such as a voice assistant and setup wizards using gTTS, SpeechRecognition, Java and Android Studio.
- Designed eyeglasses-shaped modular enclosure in 3D using Autodesk Fusion 360.

ACADEMIC HONORS AND AWARDS

- Chosen to represent Turkey in Regeneron Virtual International Science and Engineering Fair (ISEF) 2021 with the project "Assistive Glasses for the Vision Impaired".
- Chosen to represent Turkey in Regeneron International Science and Engineering Fair (ISEF) 2020 with the project "Assistive Glasses for the Vision Impaired". Was awarded "Finalist" due to the cancellation of judging in ISEF 2020 because of the COVID-19 pandemic.
- Ranked 1st place in TUBITAK's 50th Ege Regional Science Fair and 2nd place in TUBITAK's 50th National Science Fair in Technology Design category with the project "Assistive Glasses for the Vision Impaired".

Book Transcriber and File Manager

Mar 2019 – May 2019

Ozel Ege Lisesi & TURGOK

İzmir, Turkey

- Took part in the book transcription of Bertrand Russell's "The Conquest of Happiness" for TURGOK (Library for Vision Impaired Individuals of Turkey).

OTHER

Languages: Turkish (native), English (TOEFL iBT: 108), German (Goethe Institute A1.2)

Programming Languages: Java, Julia, Python 3, x86 Assembly, JavaScript, HTML/CSS

Frameworks & Libraries: Vue.js, TensorFlow, Keras, PyQt 3, Pandas, Knet.JL, AutoGrad

Developer Tools: Git, AWS, Linux

Other Interests: Guitar, 3D Design and Printing
